PHILIPS
Saeco

Highlights

SBS (Saeco Brewing System)

Philips Saeco exclusively allows you to adjust your espresso's intensity, altering the crema and body structure as it is dispensed. Simply by turning the knob you can prepare the crema exactly according to your taste. A little knob that makes a big difference.

Adjustable milk froth

Only the Saeco coffee machine offers an intelligent milk froth adjustment system. Simply select the level of froth you'd like via the beverage menu.

Auto cleaning and de-scaling

Easy to use and easy maintenance: Thanks to the automatic cleaning and descaling cycles, you are guaranteed perfect enjoyment every day and maximum longevity for your automatic espresso machine.

Removable brewing group

The brewing group is at the heart of every fully automatic coffee machine and it should always be kept clean. A task that doesn't get any more convenient than with a Saeco: remove, rinse and re-insert — finished.

Full customisation

Everything just the way you like it: With this coffee machine you can choose your favourite coffee blend and adjust coffee length, intensity, temperature, crema and body structure until they all meet your personal taste perfectly.

Ergonomic day to day

Saeco is a synonym for convenience: refilling beans or water, emptying the coffee-dump box or the drip tray, all compartments of the fully automatic coffee machine are directly accessible.

Immediate beverage selection

Whether you want a cappuccino or an espresso, with the immediate beverage selection you can enjoy your personally customised beverage speciality at the touch of a button

9 personalised beverages

With Philips Saeco Xelsis you have a wide choice of beverages from espresso to latte macchiato. You can personalise each coffee speciality, adjusting both coffee and milk settings to how you want them.
